DETAILED ACTION

Claims

1. Claims 1-15 are pending.

Specification

2. The disclosure is objected to because of the following informalities: the last four pages of the specification do not meet the margin requirements for US applications.

Appropriate correction is required.

Claim Objection

3. Claim 5 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 5 depends on itself.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

What does "super" refer to? The size of the balloon? The placement of the balloon over the tubing of the catheter?

Please clarify the claims.

5. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

What does "nylon or 12" mean?

Please clarify the claim.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Weber (US 2003/0065355A1; effective filing date(s) based on provisional applications filed on 28 September 2001 and 05 October 2001).

Weber teaches medical devices comprising nanomaterials (abstract) containing nanoparticles and matrix materials (page 3, par. 0026, line 7). At page 3, par. 0029, line 4, it teaches polyamides and polyesters. "Nylon 12" is at page 11, par. 0100, line 2. At page 3, par. 0032, it recites clay in nanoparticles (line 3), ceramic nanofibers (line 9), carbon nanotubes (line 10) and alumina nanofibers (line 13). The nanoparticles are used in amounts of 0.0005% to 99% (page 4, par. 0034, lines 6-7). The nanomaterials are used in tube/balloon assemblies for catheters (Figure 3; page 9, all of par. 0082).

If "super" is being used to connote the placement of the balloon over the tubing of the catheter, Figure 3 of Weber shows such placement.

If "super" refers to size, the size of the balloon used in the devices of Weber is not a patentably distinguishing feature.

Conclusion

Any inquiry concerning this communication should be directed to the Examiner, Sandra M. Nolan, whose telephone number is 703/308-9545. The Examiner can normally be reached on Monday through Thursday, from 6:30 am to 4:00 pm, Eastern Time.

If attempts to reach the Examiner by telephone are unsuccessful, her supervisor, Harold Pyon, can be reached at 703/308-4251. The general fax number for the art unit is 703/305-5436. The fax number for after final communications is 703/872-9310. The receptionist answers 703/308-0661.
